a
median KL
N = 155
KL = 0.002 nats
MD frames
network
closed form
probability density [nm^{-1}]
R_g [nm]
b
95th-percentile KL
N = 324
KL = 0.03 nats
MD frames
network
closed form
R_g [nm]
c
largest KL
N = 154
KL = 0.25 nats
MD frames
network
closed form
R_g [nm]
d
median: 0.002
95th percentile: 0.031
proteins
KL(network ‖ closed form) [nats]
e
θ chain
good solvent
validation split, n = 695
fitted to each protein's MD frames
network
closed form
proteins
exponent ν
